Martin Mathys

Martin Mathys®

Pioneer in innovations

Martin Mathys, founder of the Mathys® company, put the emphasis on **outstanding quality** from the earliest days back in **1845**. We have been faithful to that deliberate choice ever since. As a result, Mathys® has grown to become one of the biggest manufacturers of paints and waterproofing products in the market. With its extensive experience and comprehensive expertise, Mathys® has been a renowned **problem-solver** for many years: realizable and long-term solutions are created for the most complex problems in increasingly international markets.

The product range is dominated by **specialised high-quality products** for coping with difficult and delicate problems in the areas of damp-resistance and decoration.

Each product is more valued than the other and all of them can be used to **decorate and protect** structures from private home to industrial construction projects. Products that also excel due to the environmentally friendly properties. All of the Mathys® products are the result of continuous research and development in the company's own laboratories.

Martin Mathys® N.V. has been part of the American holding company **RPM®** since 1992. That ensures its further expansion and development of both products and markets, without losing touch with the customers that supported the company over many years.

RUST-OLEUM EUROPEAN BUSINESS GROUP

Rust-Oleum®

From fish to paint

The Scottish sea captain Robert Fergusson noticed that the decks of his ship would not rust in places where fish oil had been spilled. On the basis of that observation, the captain developed the first rust-proofing paint with a fish oil base. In 1921, he perfected a paint that prevented rust and would dry in one night without unpleasant odours. RUST-OLEUM® Corporation was born.

Rust-Oleum® Mathys®

Best solutions in paints and coatings

In Europe, Rust-Oleum® focuses on the development, production and sale of industrial paints and coatings for professional users. Together, Mathys® and Rust-Oleum® offer more than 250 years of paint experience. The bundling of their knowledge, expertise, and experience leads to more possibilities, new solutions and trend-setting innovations. The close collaboration of the production centres in Zelem (B) and Roosendaal (NL) ensure the continuity of deliveries. That also results in large product-development capacity. The sites also comply with environmental and safety regulations, of course, and invest continuously to be able to continue to meet the highest standards.

RPM®

RPM® International Inc. In an international holding company with subsidiaries that manufacture and sell high-quality coatings, sealants and specialised chemicals. They are intended for maintenance and improvement purposes. In 2011, turnover at the company was \$3.38 billion. Fifty-seven per cent of that turnover was generated in the United States of America and 43% in the global markets. RPM® has approximately 9,000 employees in 78 branches over 18 countries.

The products, which are sold in approximately 150 countries, include the following major brands:

Timberex®

THE BEST NATURAL PROTECTION FOR WOOD

Timberex® International originated in southeast England. It has been producing environmentally friendly and long-lasting oils for floors, countertops, planks, furniture and creative applications since 1927. The goal of Timberex® is to offer its customers the best possible protection for wood. Timberex® has been certified with ISO 9001 and BSEN71. Its oils are all made of natural, renewable raw materials and comply with the latest health and safety regulations. They all comply with VOC 2010 and have also been certified as compliant with EN71-3, which covers safety standards for food and children's toys.

Zinsser®

Innovation, quality and problem-solving are Zinsser's basic principles; the company has been true to those principles since 1849. With the introduction of the shellac resins in its primers early in the 1800s, the company was able to successfully combat mould, damp and similar problems. Zinsser® became well known among professional painters as a way of dealing with those problems. The Zinsser® products have all been prepared in ISO 9001-certified production sites in Europe.

PICTOGRAMS & LOGOS

Easy-to-understand symbols

The symbols show the most important product characteristics.

PICTOGRAMS

LOGOS

Ecolabel

Eco-Nature range

Law Grenelle classification (France)

Emissions in indoor air.

In addition to the European Directive on VOC, the French law on the reduction of emissions in indoor air, requires labelling of paint products indicating their emissions of volatile substances. There are four classes (A+, A, B, C), Class A+ indicating the lowest emissions.

ColourShop® 
ADVANCED COLOUR SERVICE BY RUST-OLEUM MATHYS

Our **ColourShop® colour-mixing machine** offers fast and accurate colour service. Visit **www.mathyspaints.eu** to find the distributor nearest to you.

The benefits for you:

- Special colours available, prepared while you wait
- RAL, NCS, British Standard, AFNOR, etc.
- Water-based products, with or without solvents
- Quick response to customer-specific colour requests
- Professional technical support
- Accurate and reproducible colours

All bases that can be tinted are indicated with the ColourShop® logo.

Protection - Renovation - Decoration

Mathys® has long been offering a complete range of professional interior paints, adapted to every type of application or substrate.

The perfect finish for beautiful results

Whether you're after a contemporary, stylishly classical or sleek modern interior, Mathys® always has the right products available. Professional products that ensure a perfect finish for all interior walls and ceilings. The combination of good substrate preparation and the right finish always ensures the best results!

Mathys® works for better health and a better environment!

By choosing Corporate Social Responsibility, you choose a harmonious combination of the 3 P's: People, Planet and Profit. This helps business activities to contribute to a sustainable society.

This also involves choosing products and services with the lowest possible negative impact on people, the environment and society, in short **approved by nature.**

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

PREPARATION

A good start is half the work!

You get the best result in finishing when you prepare the surface properly before you start. It is important for damaged, uneven surfaces to be cleaned and prepared and for walls and ceilings that are highly absorbent to be primed properly. The finishing layer can then be applied with greater chance of success.

PEGACRETE®

Powdered repair product on cement base for indoor and outdoor use

- Levels and repairs cracks, holes and other damages
- Mix the powder with water
- Quick hardening
- Good mechanical resistance
- 100% shrink-resistant - easy to apply

5kg
15kg

ELASTOFILL®

Elastic, recoatable jointing paste

- Multi-use: sealing - jointing - filling - fixing
- Universal paintable
- Permanent high elasticity
- Absorbs strong expansions and deformations
- Waterproof - very good adhesion

125cc
310ml

ELASTOPRO

Elastic sealant of professional painter's quality

- Sealing and finishing of joints and cracks
- Quick recoatable
- For inside use
- Excellent adhesion

310ml

PLASTOPAN LATEX

Water based extra white putty filler

- Very elastic and flexible
- Easy to apply
- Easy to sand

5kg

PEGAFLEX®

Leveling filler

- High flexibility and elasticity - can be sanded easily
- Excellent adhesion on all sound substrates and paints
- Hardly absorbs the binder of paints on top of it thus avoiding dry spots

1kg
5kg

MULTI CLEANER

Universal cleaning agent and degreaser

- Degreasing of surfaces - Non smelling - Non-foaming
- Inside and outside use
- Makes surfaces antistatic before painting
- Biologically degradable - user-friendly

& download our
Product guide Wood

Quality - Reliability - Guarantee

Mathys® protects and beautifies all types of wood

The Mathys® range of wood preservative products offers superior protection and maximum durability for all your wood projects.

The day that a wood project is installed is the day that problems can begin. Morning mist, rain, melting ice and snow are quickly absorbed by untreated wood. This makes the wood softer and makes it swell. Direct exposure to the sun causes it to dry out again and then the wood shrinks.

Continuous cycles of wet, dry, swelling and shrinking make the wood warp, burst and crack. This leads to premature wood deterioration and costly repairs.

Unprotected wood also ages due to constant exposure to UV rays. Persistent damp provides a perfect environment for the growth of mould, algae and other organisms that attack wood. Termites and other wood insects use wood as a food source, resulting in rot and decay.

Choose the right product

Wood is natural, warm and authentic. It is decorative and stylish. It is a precious and resistant material. Durable protection and decoration for your wood project: that is our goal.

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

PREPARATION

Careful puttying with Plastopan Super N, followed by sanding, is the basis for good adhesion of a primer or finishing layer. It assures you of an attractive result. Sand the puttied sections smooth with (fine) sandpaper and remove the sanding dust. We recommend applying a primer on bare wood before using a putty on it.

PLASTOPAN SUPER N

Putty for levelling irregularities in wood

- Quick drying
- Excellent filling power
- Doesn't contain water-soluble ingredients
- Does not absorb applied paint

1kg
5kg

RAPID® SUPER PLUS

High viscosity green paint stripper

- Without methylene chloride
- Very active and effective stripping effect
- Very suitable for all kind of paints (water and solvent based)
- Also suitable as glue remover

1l
2,5l

MULTI CLEANER

Universal cleaning agent and degreaser

- Degreasing of surfaces - non smelling - non-foaming
- Use inside and outside
- Making surfaces antistatic before painting
- Biologically degradable - user-friendly

1l
5l

PRIMERS

Mathys® has a variety of wood primers, either water-based or solvent-based, each with its specific properties suitable for different surfaces and applications. Our primers improve the adhesion and usually dry quick enough to make it possible to start painting the finishing layer soon after the primer has been applied. A professional paint job for wood usually starts with a good primer.

FASSIPRIM® PRIMER

Solventbased primer

- Excellent flow and adhesion on wood
- Moisture power regulating
- High covering - quick drying
- Easy to apply easy to sand finely - very weather resistant

11
2,5l
4l

FASSIPRIM® AQUA XPE PRIMER

Waterbased moisture regulating primer

- Excellent adhesion and flow - good coverage
- Quick drying - can be sanded quickly
- Easy to apply
- Matt acrylic

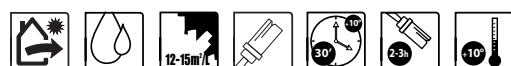

11
2,5l

FASSITEK® UV WOOD PRIMER

UV Wood protection primer

- Binds with the wood fiber
- For use under Fassitek® wood stains or Fassithane Varnishes
- Protects against UV damage
- Significantly extends varnish durability

STAINS – VARNISHES - OILS

TRANSPARENT WOOD FINISHING

Transparent products preserve the natural appearance of the wood (structure, colour, grain, etc.) The wood to be treated, the colour and the number of layers used will have an impact on the final result. The more transparent the colour, the less the wood is protected against natural influences.

STAINS

FASSITEK® SEMI-MATT

Transparent wood stain

- Transparent and light-stable
- Penetrates for deep protection - non film-forming
- Enhances the wood structure - microporous - allows the wood to breathe
- Excellent outdoor durability - good protection against UV rays

1l
2,5l
10l

FASSITEK® THIXO SEMI-MATT

Transparent thixotropic wood stain

- Transparent and light-stable - thixotropic alkyd resins
- Penetrates for deep protection - non film-forming
- Enhances the wood structure - microporous - allows the wood to breathe
- Excellent outdoor durability - good protection against UV rays

1l
2,5l
10l

FASSITEK® AQUA OPAQUE SATIN

Opaque wood stain

- Can be used as a primer or as a finishing layer
- Flexible system - damp regulating - waterproof
- Is resistant to dirt - easy to maintain
- Excellent coverage and flow - quick drying - can be painted over after 2 hours

1l
2,5l

VARNISHES

FASSITHANE **GLOSS**

- Contains UV filters which will slow down the greying process
- Keeps the wood looking fresh
- Deep-penetrating, hardening natural oil
- Available in Clear, Teak(Brown) and Bangkirai(Red)
- Food and Toy-Safe (EN71-3 Certified)

11
51

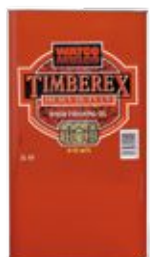

TIMBERGUARD MOUSSE

Maintenance foam with active UV-inhibitor

- Surface will be touch-dry within an hour
- Slows down the bleaching effect from harmful UV-radiation from the sun
- Water-resistant after 24-48 hours
- Food and Toy-Safe (EN71-3 Certified)

150ml

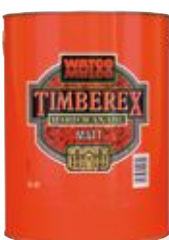

TIMBEREX® HEAVY DUTY UV

Specially formulated for high traffic areas

- Includes a UV-blocker which will inhibit the bleaching of the surface by harmful UV rays
- Penetrates deeply into the wood
- Especially for using extensively in airports, sports halls, museums, art galleries, conference centres, offices etc.
- Cured and buffed surface has a highly wear and water-resistant finish with a deep satin sheen
- Food and Toy-Safe (EN71-3 Certified)

11
51

TIMBEREX® HARD-WAX OIL

Oil that greatly enhances colours and grain

- Allows wood to age naturally into rich varying tones
- Can be used on all surfaces such as wood floors, furniture and worktops
- Same day application and finish - Easy to apply with a brush or roller
- Satin and matt version
- Food and Toy-Safe (EN71-3 Certified)

11
51

TIMBEREX® COLOURED

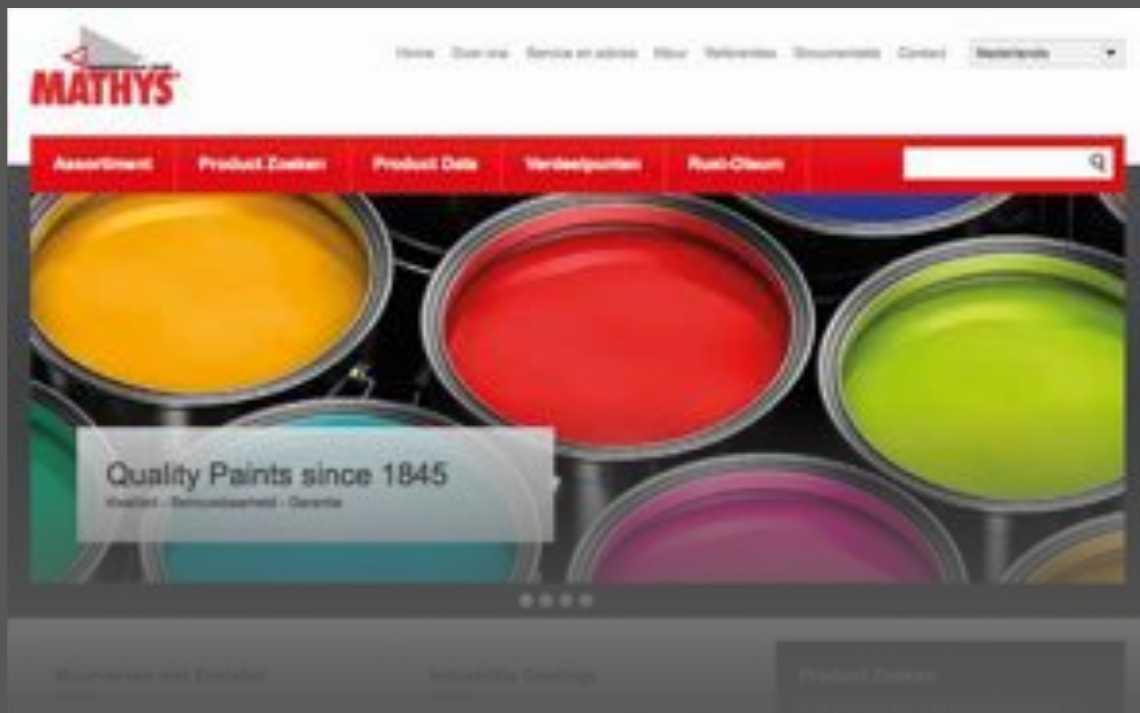

Natural Oil with colour agents

- Ideal for commercial or domestic use, on floors, stairs, panelling etc.
- Made from natural resins, fast drying oils and colour agents which penetrate deeply into the wood filling the pores to form a wear and water resistant surface
- 10 attractive colours available
- Cured and buffed surface has a highly wear and water-resistant finish
- Food- and Toy-Safe (EN71-3 Certified)

EXTERIOR WALLS

Quality - Reliability - Guarantee

Durable protection and beautifying

The facade is the public face of a home or other building. But a facade is subjected to numerous internal and external influences: sun, wind, moisture, construction faults... The possible consequences are often hard to estimate: cracking, rising damp, rusting concrete reinforcement, loose plastering, moss, mould, algae, ...

Durable protection and regular maintenance of your facade are of vital importance in preventing problems. Mathys® therefore offers an extensive range of paints and coatings that protect and beautify your facade.

Years of experience translated into expertise

For more than four decades, Mathys has been developing effective, contemporary solutions for protecting, renovating and decorating facades. Mathys distinguishes itself through its expertise and unparalleled quality and has evolved worldwide into the first port of call for facade protection and decoration.

Mathys®. Your partner for protecting and beautifying new and renovated facades.

For an optimal, durable solution. Guaranteed.

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

PREPARATION

Good preparation of the façade before starting painting is essential. All of the problems should be dealt with first.

PEGACRETE®

Powdered repair product on cement base for indoor and outdoor use

- Levels and repairs cracks, holes and other damages
- Mix the powder with water
- Quick hardening
- Good mechanical resistance
- 100% shrink-resistant - easy to apply

5kg
15kg

MURFILL® MESH WOVEN

Polyamide fibres woven in block meshes

MURFILL® FLEECE NON WOVEN

Polyester fibres

- Reinforcement of the Murfill® waterproofing system

16cm/100m
100cm/100m

MUR-FILLER

Elastic joint filler for exterior walls (with quartz)

- High filling power
- Filler for reparation of active and non-active cracks, can be used interior and exterior
- Elastic
- Not sandable (contains quartz)

310ml

ELASTOFILL®

Elastic, paintable jointing paste

- Multi-use: sealing - jointing - filling- fixing
- Universal paintable
- Permanent high elasticity
- Absorbs strong expansions and deformations
- Waterproof - very good adhesion

125cc
310ml

MULTI CLEANER

Universal cleaning agent and degreaser

- Degreasing of surfaces - non smelling - non-foaming
- Using inside and outside
- Making surfaces antistatic before painting
- Biologically degradable - user-friendly

1l
5l

PEGAFLEX®

Leveling filler

- High flexibility and elasticity - can be sanded easily
- Excellent adhesion on all sound substrates and paints
- Hardly absorbs the binder of paints on top of it thus avoiding dry spots

1kg
5kg

PRIMERS

Mathys® has adapted a number of exterior-wall primers (water-based or solvent-based) to match the type of surface and the conditions. Our primers are formulated so that painting the finishing layer can start soon after the primer has been applied.

PRIMER 44HS

PRIMER

Adhesive primer for porous and mineral surfaces

- Chloro rubber based
- Fixing and reinforcing
- Flexible

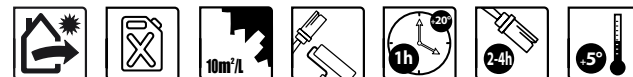

1l
5l
20l

FIXONAL

Colourless fixating agent

- Fixing and reinforcing
- To strengthen all porous or chalking substrates
- Quick drying
- Flexible

1l
5l

PARASIL COMPACT

PRIMER • INTER

High build priming and intermediate coat based on waterborne acrylic and polysiloxane resins

- Very thick coat with high covering power (application in 1 or 2 coats)
- Levels out partial roughness in structured substrates
- Elastic film - exceptional weather resistance - water vapour permeable
- To recoat with 1 or 2 coats of Parasil

ColourShop 

15l

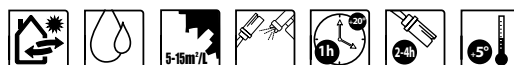

PEGAFIX UNIVERSAL

PRIMER

Colourless impregnating primer

- Ideal for porous mineral surfaces
- Fixing the substrate
- High fixing capacity

0,75l
4l
18l

PEGAPRIM EXTERIOR

PRIMER

Water-based tintable opaque primer, based on acrylic resins

- Strengthens the surface and reduces absorption
- Makes the surface uniform in terms of colour and absorption
- Very good hiding - water vapour permeability
- Improves the adhesion of the topcoat

ColourShop²
ADVANCED COLOUR SERVICE BY RUSPOLEUM MARBRES

5kg
15kg

MURFILL® WP INTER

PRIMER • INTER

Elastic intermediate coat for renovation in combination with Murfill® WP Plus NF

- Acrylic system - very flexible
- Waterproof and water vapour permeable - elastic - crack bridging
- Levels out partial roughness in structured substrates
- Very thick coat with high covering power

ColourShop²
ADVANCED COLOUR SERVICE BY RUSPOLEUM MARBRES

5kg
15kg

MURPRIM AQUA NF

PRIMER

Primer for Murfill® RP Siloxan NF & Murfill® WP Plus NF

- Impregnates and fixes sound not chalking substrates.
- Elastic film - high covering power - resistant to alkalinity of mineral substrate. (alkali resistant primer)
- Water vapour permeable - excellent weather resistance - exceptional durability
- Can be applied on well preserved old paint coats

ColourShop²
ADVANCED COLOUR SERVICE BY RUSPOLEUM MARBRES

5kg

WATERPROOFING SYSTEMS

The unique Murfill® formula combines the best from different systems. The combination of various binders ensures a homogenous, elastic product that is water-repellent, water-proof and micro-porous. The combination of those properties, make Murfill® the leading brand in waterproof wall paints in the world.

MURFILL® WATERPROOFING COATING SEMI-MATT

Long lasting elastic, aesthetic and waterproof wall protection

- 400 % Elastic - waterproof and water vapour permeable
- Excellent resistance against ageing in normal and industrial environment
- Protects reinforced concrete against carbonisation and corrosion
- Can be combined with Murfill® fleece for additional mechanical reinforcement and for bridging of (active) cracks

ColourShop® 2

ADVANCED COLOUR SERVICE BY RUSQUELUM HANDBY

1kg
6kg
15kg

MURFILL® WP PLUS NF MATT

Elastic matt waterproof wall protection

- UV-resistance and self-cleaning system - acrylic resin waterborne
- Elastic film - permanently prevents and repairs all micro cracks - high covering power
- Waterproof and water vapour permeable
- Exceptional durability and weather resistance

ColourShop® 2

ADVANCED COLOUR SERVICE BY RUSQUELUM HANDBY

5kg
20kg

MURFILL® RP SILOXAN NF MATT

Elastic acrylic poly-siloxane renovation paint

- Excellent resistance against ageing in normal and industrial environment
- Self-cleaning pearl effect - water repellent - water vapour permeable
- High covering power
- Elastic

ColourShop® 2

ADVANCED COLOUR SERVICE BY RUSQUELUM HANDBY

20kg

MURFILL® QUARTZ

Facade protection with quartz texture

- Excellent resistance against ageing in normal and industrial environment
- Waterproof and water vapour permeable - elastic
- Protects steel reinforced concrete against carbonization and corrosion
- With structure effects

6kg
15kg

DECORATIVE

Along with the protective factor, the aesthetic aspect is also important when maintaining or renovating your façade. Without colour, our lives would be sombre and grey. Colour gives a façade its own character and creates an atmosphere and an identity. In addition to a range of glosses and structures, Mathys® also offers an extensive selection of colours.

MURFILL® RENOVATION PAINT MATT

Elastic decorative renovation paint

- > 500 % elastic - lasting elasticity till -30°C
- Water vapour permeable - protects against carbonisation
- Excellent resistance against ageing and contamination
- Can be combined with Murfill®-Fleece for bridging of (active) cracks

1kg
6kg
15kg

MURFILL® RP SILOXAN NF MATT

Elastic acrylic poly-siloxane renovation paint

- Excellent resistance against ageing in normal and industrial environment
- Self-cleaning pearl effect - water repellent - water vapour permeable
- High covering power
- Elastic

5kg
20kg

PARASIL MATT

High build matt wall paint with siloxane

- High covering power - covers and levels out irregularities and edges partially - high build
- Low odour - micro porous - water dilutable
- Dirt and water repellent - water vapour permeable
- Self-cleaning pearl effect - weather and pollution resistant

5l
15l

PARACEM® SEMI-MATT

Acrylic exterior wall paint with high covering power

- Particularly high covering capacity
- Perfect saponification resistance - sufficiently breathing
- High durability - excellent weather resistance
- For outside and inside use

1l
4l
10l
20l

PARACEM® SEMI-GLOSS

Semi-gloss acrylic wall paint with high covering power

- Particularly high covering capacity
- Gloss stability
- High durability
- Unsaponifiable

ANTI-GRAFFITI

Any surface can find itself the victim of unwanted graffiti attacks. On unprotected façades, the colours of the paint are absorbed deep into the pores of the surface. If the graffiti is not removed from the façade professionally, irreparable damage will result. Our anti-graffiti coatings are a pre-emptive measure against graffiti and protect surfaces against weathering.

PEGAGRAFF® HYDRO SATIN

Colourless anti-graffiti varnish - two-component

- Excellent flow
- Water vapour permeable - good UV resistance
- Solvent resistant thus allowing easy removal of graffiti
- High scratch resistant

2,5l
5l

PEGAGRAFF® PLUS

Permanent hydrophobic anti-graffiti system

- Easy to apply - nearly invisible - non film forming
- Water vapour permeable - very good UV resistance
- Resistant to alkalinity - hydrophobic system - long lasting system
- After graffiti removing coating stays intact and more cleaning operations are possible

5l

PEGAGRAFF® WAX SEMI-MATT

Sacrificial wax-based anti-graffiti system

- Biological - no VOC ingredients
- UV resistance - water vapour permeable
- Nearly invisible - fast working
- Economical in usage

5l

PEGAGRAFF® CLEANER NEW

Liquid graffiti remover

- Excellent and fast working - no colour
- No odour
- Ideal for closed rooms
- For underground and surfaces treated with Pegagraff® Hydro or Pegagraff® Plus

500ml
5l

WATER REPELLENT PRODUCTS

Combating damp in the façade construction is one of the most important things one can do to protect it. Hydrofuges are water-repellent products for impregnating façades and provide long-term protection from water and other contaminants. Hydrofuges create a transparent layer over the façade, leaving the appearance of the surface unchanged. The layer is water-repellent and micro-porous.

SECCO® SUPER

Solvent based water repellent product

- Makes porous and mineral substrates water repellent - water vapour permeable (breathing)
- May be applied on dry recent masonry
- Deep penetration in the substrate
- Does not change the color of the substrate - colorless

1l
5l
20l

SECCO® HYDRO

Water based water repellent product

- Deep penetration in the substrate - almost invisible - water vapor permeable
- Alkaline resistant - applicable on alkali surfaces (mortar)
- Reduces salt efflorescence, frost damage, mortar leaching, moulds, moss and algae growth and erosion, etc
- Can be applied on relatively humid and warm surfaces

5l
10l

SECCO® HYDRO CREME

Paste based hydrophobic impregnation

- Makes mineral surfaces and mostly non-porous concrete durably water-repellent
- Good alkali resistance
- Very high level of penetration - practically invisible
- Solvent-free - negligible volatility

5kg
10kg

METAL

Decorate & Protect metal from rust !

With our specially developed metal paints, you can make your painting substantially easier. The paints offer several benefits:

Benefits :

- Long-term protection
- Can be applied directly onto rust
- Only one layer required!
- Lead-free and chromate-free
- Available in most RAL colours
- More efficient, more m²
- High degree of scratch and corrosion resistance
- Better opacity
- Long-lasting flexibility

Professional products that are easy to use.

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

PRIMERS

Metal is often smooth and hard to cover. Older metals often have weathered or rusted sections. That is why we always advise cleaning the metal surface very well before starting, removing any grease, oil or rust and sanding, if necessary, to achieve a lovely and long-lasting result. With our CombiColor® rust and adhesion primers, you can rest assured that you will enjoy your metal projects for years to come.

ADHESION PRIMER

Makes the smoothest surface coatable!

- For galvanised steel, aluminium, stainless steel, zinc, hard PVC, copper, ceramic tiles, porcelain, glass, etc.
- Easy to apply - transparent blue finish
- Recoatable after just 30 minutes
- Very high coverage: 35 m²/l

PRIMER

250ml
400ml
750ml

ANTI RUST PRIMER

For even longer anti-rust protection

- Recoatable after 2 hours
- Lead and chromate free
- Grey for light coloured topcoats
- Red for dark coloured topcoats

MISCELLANEOUS

COMBICOLOR® THINNERS

Diluent for spray application

For spray application however it is advised to use a CombiColor® thinner

- Standard 1l - 7301
- Hammertone 1l - 7302

1l

SURFA ETCH®

Etching solution

- Improves the adhesion of the coating
- Neutralises alkaline salts
- No objectionable odour or fumes
- Alternative to abrasive blasting
- Easy to use, ready in 15 min, application with brush
- 6-8 m²/l

5l

ANTI-RUST METAL COATING

COMBICOLOR®

One coat maintenance system for metal

- Long-lasting protection - one coat system - direct to rust
- More m²: 10,5 m² per litre - excellent hiding power
- Lead and chromate free - low odour
- Sag resistant - no brush strokes
- Standard colours - RAL colours and more colours via Colourshop® tinting service
- Available in Hammertones, wrought iron, Matt and Satin finish

FLOORS

Flooring by a specialist!

Protecting and decorating floors is the work of specialists. Our expertise in this area grew out of the many years that we supplied systems to the flooring sector.

We have a complete and up-to-date product assortment that was developed to protect and decorate virtually any type of floor under the most common conditions – indoor, outdoor, low-traffic, high industrial traffic, in environments where chemicals are spilled, when the floors are exposed continuously to moisture, floors that are cleaned frequently, etc.

Our floor coatings have been used to protect and decorate more than 10 million square metres of floors to date.

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

FLOOR COATINGS

Are you looking for a floor coating with excellent chemical-resistance properties? Hard, wear-resistant?

PEGAKOTE® SATIN

2-component water dilutable epoxy coating for indoor works

- High hardness - Exceptional abrasion resistance
- Exceptional chemical resistance (oil, fuel, several solvents etc.)
- Solvent free - almost odourless
- Easy to maintain

ColourShop²
ADVANCED COLOUR SERIES BY RUSCOLEUM MATHYS

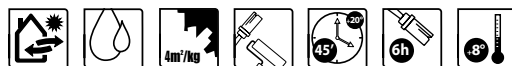

4kg
15kg

PEGASOL® QUARTZ

2-component water based anti-slip floor coating

- Easy application - no odour
- High abrasion resistance
- Excellent adhesion on most substrates
- High mechanical resistance

7kg

TEGLON GLOSS

Floor coating

- Appropriate for the treatment of old (> 2 years) dry concrete floors
- Inside and outside
- Highly resistant to abrasion and not aggressive cleaning products
- Short resistance against oil, fuel, several solvents etc.

0,75l
5l
20l

TARMACOAT

Water-based flexible acrylic paint

- Rain proof after just one hour!
- Water-based and contains no VOC
- Quickly back into service (allows light traffic in 24hrs)
- Can be applied on slightly damp surfaces
- Single pack, easy to apply
- Excellent resistance to U.V. and weathering
- Velvety matt finish

5l

MISCELLANEOUS

Mathys® has a variety of products to prepare and simplify the floor work you do.

PEGACRETE®

Powdered repair product on cement base for indoor and outdoor use

- Levels and repairs cracks, holes and other damages
- Mix the powder with water
- Quick hardening
- Good mechanical resistance
- 100% shrink-resistant - easy to apply

5kg
15kg

SURFA ETCH®

Etching solution

- Improves the adhesion of the coating
- Neutralises alkaline salts
- No objectionable odour or fumes
- Alternative to abrasive blasting
- Easy to use, ready in 15 min, application with brush
- 6-8 m²/l

5l

ND14

Concentrated alkaline cleaner / degreaser

- Non-flammable, virtually odour-free
- Removes grease, oil, proteins, dirt and many other contaminants from coated, mineral and steel substrates
- Can also be used as additive for high pressure cleaning

5l

Go to www.mathyspaints.eu - www.rust-oleum.eu

ROOFS

Renew your roof cost-effectively!

Roof coatings are often the most cost-effective alternative for renovating roofs of commercial buildings and homes. Repairing and renovating roofs has been one of our specialities for years. We offer a complete range of coatings for renovating and waterproofing: Pitched roofs, flat roofs, metal roofs, tiled roofs.

Our systems have been developed for waterproofing, protecting and decorating all roof materials.

The assortment extends to systems for balconies, outdoor paths, patios, and car parks. The systems are easy to use over a wide range of temperatures and under all weather conditions. They dry quickly and all systems are operational again after a very short time.

All products are applied 'cold' and are therefore easy to use, with no risk of fire.

This product catalog is an overview of the entire assortment of decorative products. Not all listed items are available in all countries. Should you require further information, please contact your local representative.

PREPARATION

A clean and smooth surface is essential for applying the adhesion primer!

PRIMER 44HS PRIMER

Binding primer for roofs

- Good UV resistance
- Chlorinated rubber technology, solvent-based
- Quickly water-resistant (1 hour after application at 20 °C)
- For porous mineral surfaces

1l
5l
20l

AMW CONCENTRATE

Effective moss-killer

- Effective cleaning fluid against moss on bituminous substrates, concrete, masonry, plaster and woodwork
- Water dilutable
- Odourless and non-toxic
- In-depth impregnation

1l
5l

PARAFIX® PRIMER

Fixating and impregnating primer

- Special impregnating primer for roofing and bituminous products
- Milky liquid which becomes colourless after drying
- Prevents the absorption of waterborne paints on porous substrates

0,75l
4l
18l

ROOF COATINGS

Roof coating is a cost-effective alternative for renovating roofs. Mathys® offers a full range of coatings for the reparation, decoration and waterproofing of pitched roofs, flat roofs, metal roofs and tiled roofs. For both commercial and residential buildings.

DACFILL®

Waterproof roof coating

- Ready-to-use water based liquid membrane for roofs
- Resistant to UV radiation, acid rain, heat, frost and pollution
- Easy to apply - super-elastic
- Flammable and self-extinguishing
- Can be painted after 24 hours
- Available in different colours

1kg
5kg
25kg

DAC® HYDRO PRO

Renovation paint for fibre cement slates

- Flexible and durable water-based acrylic paint
- For renovating and protecting fibre cement (type Eternit®) slate, corrugated iron and concrete roof tiles
- Long-lasting gloss and color retention good weather resistance
- Breathable - elastic

20l

DAC® HYDRO PLUS

Water based roof tile paint

- For renovation and protection of various roof tiles
- Micro porous - elastic
- Waterproof / can be handled after 2 hours
- Long-lasting gloss retention
- Easy to apply

15l

FILLCOAT® / FIBRES

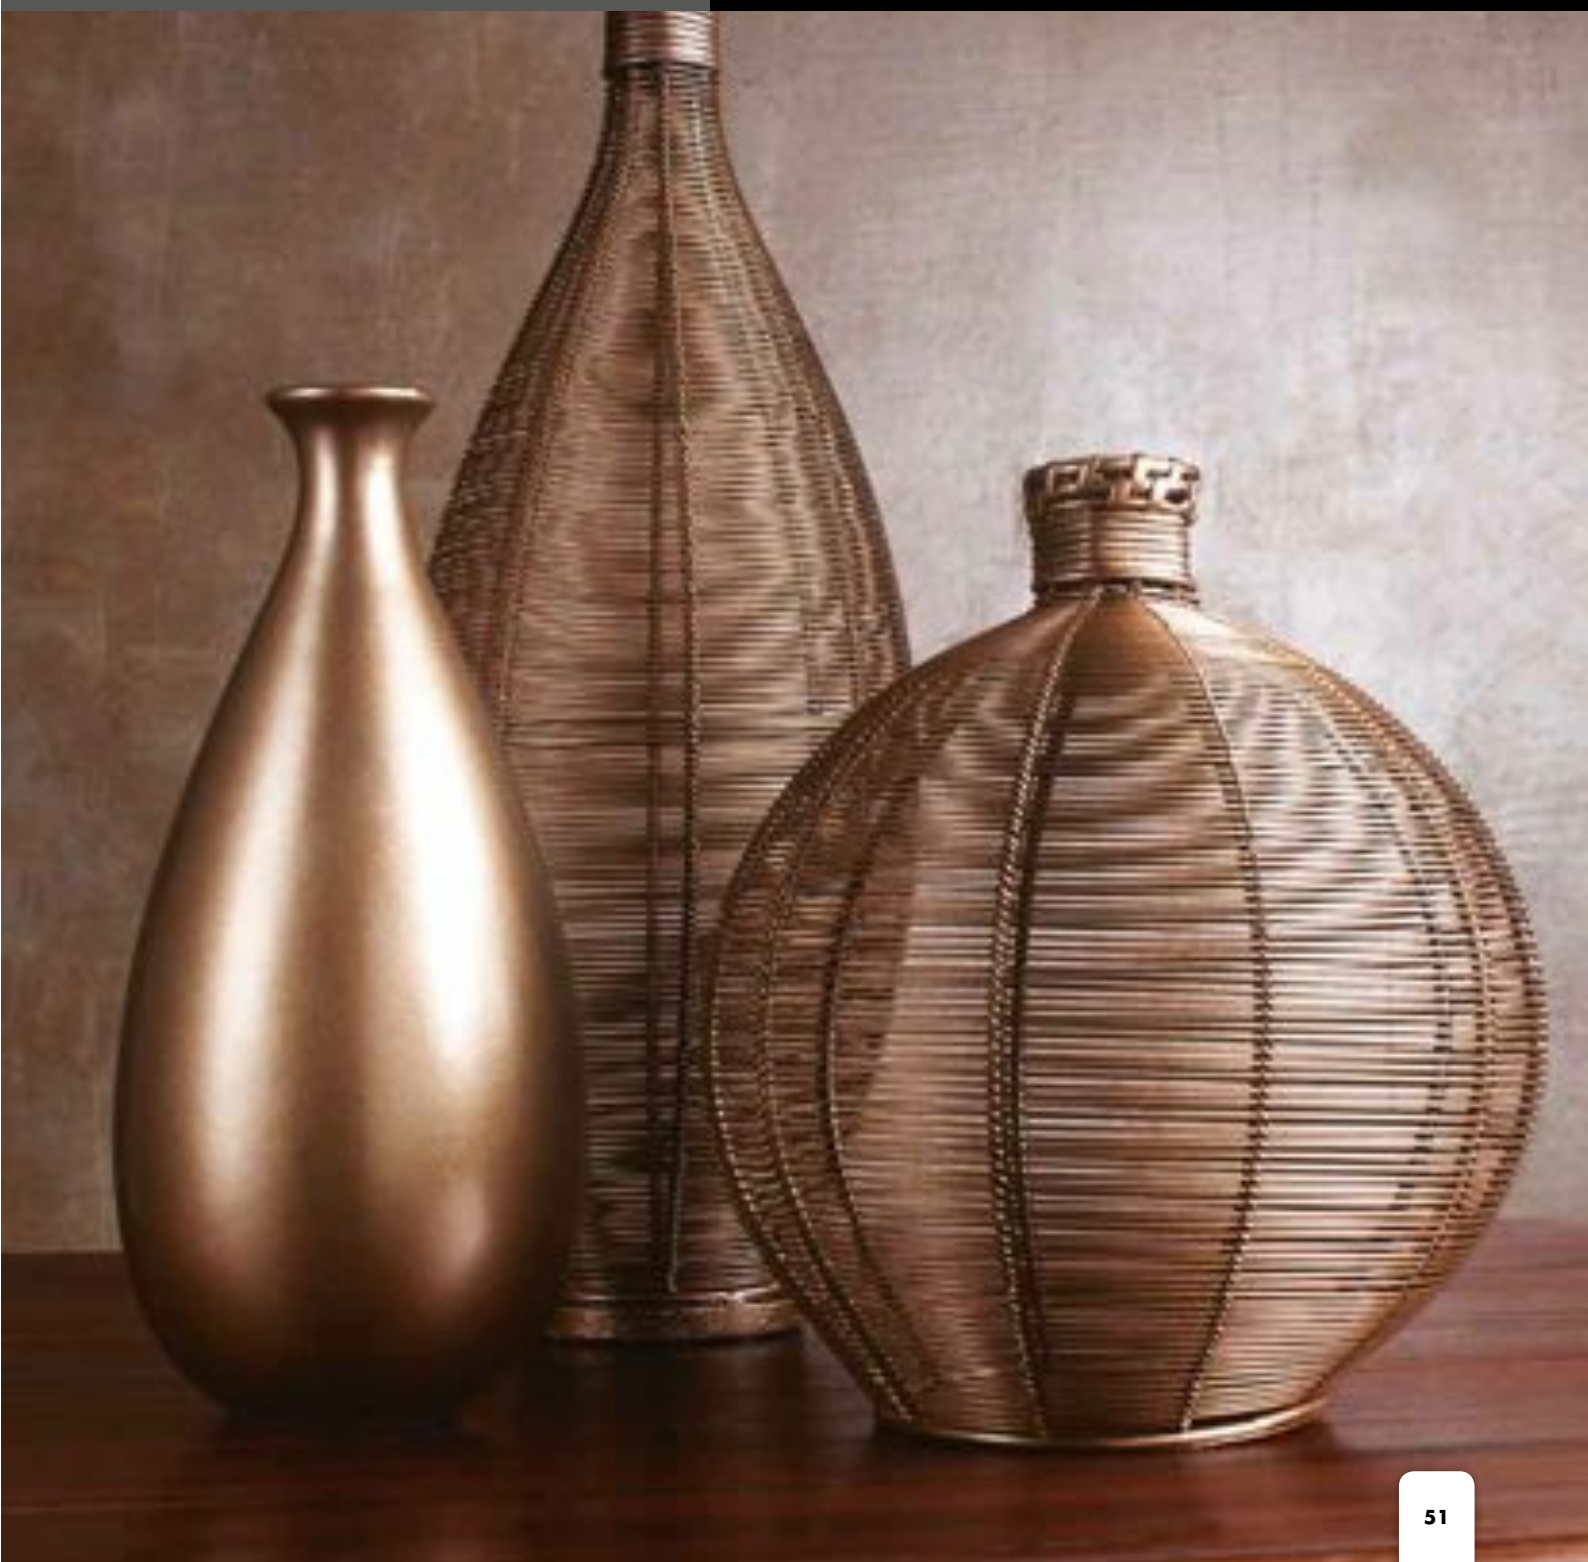

Water sealant product for immediate waterproofing

- Ideal for roofs, gutters, ridges, chimney stacks, terraces without foot traffic etc.
- Bitumen-free solvent-based formula
- Immediately watertight
- Can be used in all weather conditions
- Excellent adhesion to various substrates
- Easy to apply with a roller, brush, floor squeegee or spatula
- Can be overcoated with Dacfill, Noxyde®
- Waterproof / can be handled after 2 hours

DECORATIVE SPRAYS

Imagine - Spray - Create !

Rust-Oleum® Corporation is the global leader in the area of protective paints and coatings for household and industrial use. These Rust-Oleum aerosol cans, using the advanced Rust-Oleum spray painting technology, give unparalleled functionality and performance.

Painter's Touch® is a range of multi-functional, decorative and protective spray paints. They are ideal for all types of products. The spray paint can be used for painting furniture, cabinets, doors, window frames, baskets, decorative edging, and general knickknacks.

Rust-Oleum® Metallic spray paint is perfect for an elegant, sparkling, metallic effect. Ideal for wood, metal, plaster, masonry, ceramics or basketry.

Universal® is the first spray paint in the world that can be used on any surface. It was developed specially for use on a wide range of surfaces, including wood, plastic, metal, masonry, concrete and vinyl. The comfortable, ergonomic hand-grip has a unique mechanism so that the paint can be applied from any angle, even upside down!

There are spray paints for even the most demanding of applications. The range includes heat-resistant stove and grill paint, high-quality varnish paint. For radiators, blackboard paint, and paint with matte-glass effect.
